## 👤 PROFILE

A curious learner and creative team player, interesting in the job role of Software Engineer. where I can utilise my understanding of coding and software development to efficiently fulfill the requirements of clients and customers.

## 📁 EMPLOYMENT HISTORY

### RPA and OCR developer at Polaris IT Solutions Inc., Lapu-Lapu City, Cebu

August 2024 — Present

Polaris IT Solutions Inc. offers a full suite of IT, cybersecurity, and HR services tailored to your business needs. With over two decades of collective expertise, we deliver agile, corporate-level solutions to drive your growth

- Optimized database queries to improve application performance and reduce response times by 10%
- Refactored legacy code to improve reliability, scalability and maintainability
- Developed a RESTful API that served as the backend for a web application, improving scalability and reducing latency by 10%

### Full stack Developer at Codergize, Beirut

July 2024 — Present

At Codergize, we are your full service tech wizards, crafting awesome digital solutions to drive innovation and success. Specializing in software development, mobile apps, and web design, we turn ideas into reality, ensuring every project is impactful and enjoyable. Let's create something amazing together!

- Developed a full-stack web application that handled concurrent users with minimal downtime
- Created a RESTful API that allowed for seamless integration with other applications
- Implemented a Responsive Design that allowed the application to be used on various devices with the same user experience

### Mobile Application developer at Afriopia , Dubai

January 2024 — June 2024

In my experience, I developed a Flutter application for optimized performance, utilizing Laravel as the backend server for communication with the Flutter dashboard API. Additionally, I integrated Flutter for efficient frontend API handling and business logic, delivering a highquality product meeting project requirements through problem-solving and efficient techniques.

- Developed an iOS and Android mobile application that achieved over 1000,1500 downloads
- Utilized Cloud technologies to create a highly scalable and reliable backend system
- Designed a user-friendly UI/UX that increased user retention

### Flutter and PHP developer at prophecious technologies, Vijayawada, India

February 2024 — May 2024

modify the existed code and fix purchased code from scrach

- Developed unit and integration tests to ensure bug-free code and a high-quality user experience
- Utilized Firebase to store and retrieve data, resulting in improved app performance and reliability

Knowledge of Engineering

◦ LANGUAGES ◦

English

- Leveraged the Android SDK to create custom views and animations, enhancing the user experience
- Optimized the application's performance by implementing caching and using memory-efficient data structures
- Developed a RESTful API that served as the backend for a web application, improving scalability and reducing latency

**Full Stack Developer at Ashewa Technology Solution (ATS) S.C, Addis Ababa**

July 2023 — January 2024

I added new functionality to an existing Django dashboard, enhancing its capabilities and improving user experience. By gaining a deep understanding of the system and implementing the necessary changes, I successfully upgraded the dashboard's features.

**Backend Developer at Aquila ICT Solution , Addis Ababa**

June 2023 — January 2024

In my experience, I developed a responsive dashboard UI using React.js with Vite for optimized performance, with Laravel as the backend server for communication with the React dashboard API. Additionally, I integrated Flutter for efficient frontend API handling and business logic. Through problemsolving and efficient techniques, I delivered a high-quality product meeting project requirements

- Developed a RESTful API that allowed the app to integrate with backend services, resulting in enhanced user experience
- Developed a RESTful API that served as the backend for a web application, improving scalability and reducing latency by 25%
- Developed a custom UI library that increased developer productivity and code reuse

**Frontend Developer at Debo Engineering, jimma**

March 2021 — February 2022

designing and front end development

- Developed a custom UI library that increased developer productivity and code reuse
